

## ACTION STEPS RECAP

### Setting up your Amazon seller account

1. If this is your first seller account then register a new account using internet connection and computer that you have set aside for this business. If you already have a seller account then DON'T CREATE ANOTHER ONE! Just login to the one you already have, you can always upgrade to professional account or downgrade to individual account.
2. Enter the necessary account information fields in your seller central account.  
(Settings/Account info ; Settings/Your Info & Policies)
3. Go through the interview wizard.
4. Enter your U.S. checking account or a bank account located in the U.K. or any country in the Eurozone (Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Malta, the Netherlands, Portugal, Slovakia, Slovenia, and Spain).
  - 4a. If you are not from the USA then register for Payoneer and go through the US payment service approval process.
5. To add a layer of security when logging to your seller central account follow the steps from the "Adding additional layer of security when accessing your seller account" lecture. In this lecture you will learn how you can use VPS to connect to your seller account, so you can

securely login to your account even when using public WiFi or hotel internet connections. This method will allow you to travel wherever you want and still have the ability to manage your Amazon business.

6. If your previous account was suspended then follow the steps from the lecture “How to get back in the game if your previous account was suspended”.

P.S.

Remember, each section and lesson adds to the previous one. In order to get most out of this course and to avoid getting overwhelmed, it's important to complete the action steps before moving to the next section.
